

# MAJOR ASTRONIST MECHANISM 3: ENTIRE ASTRONISM

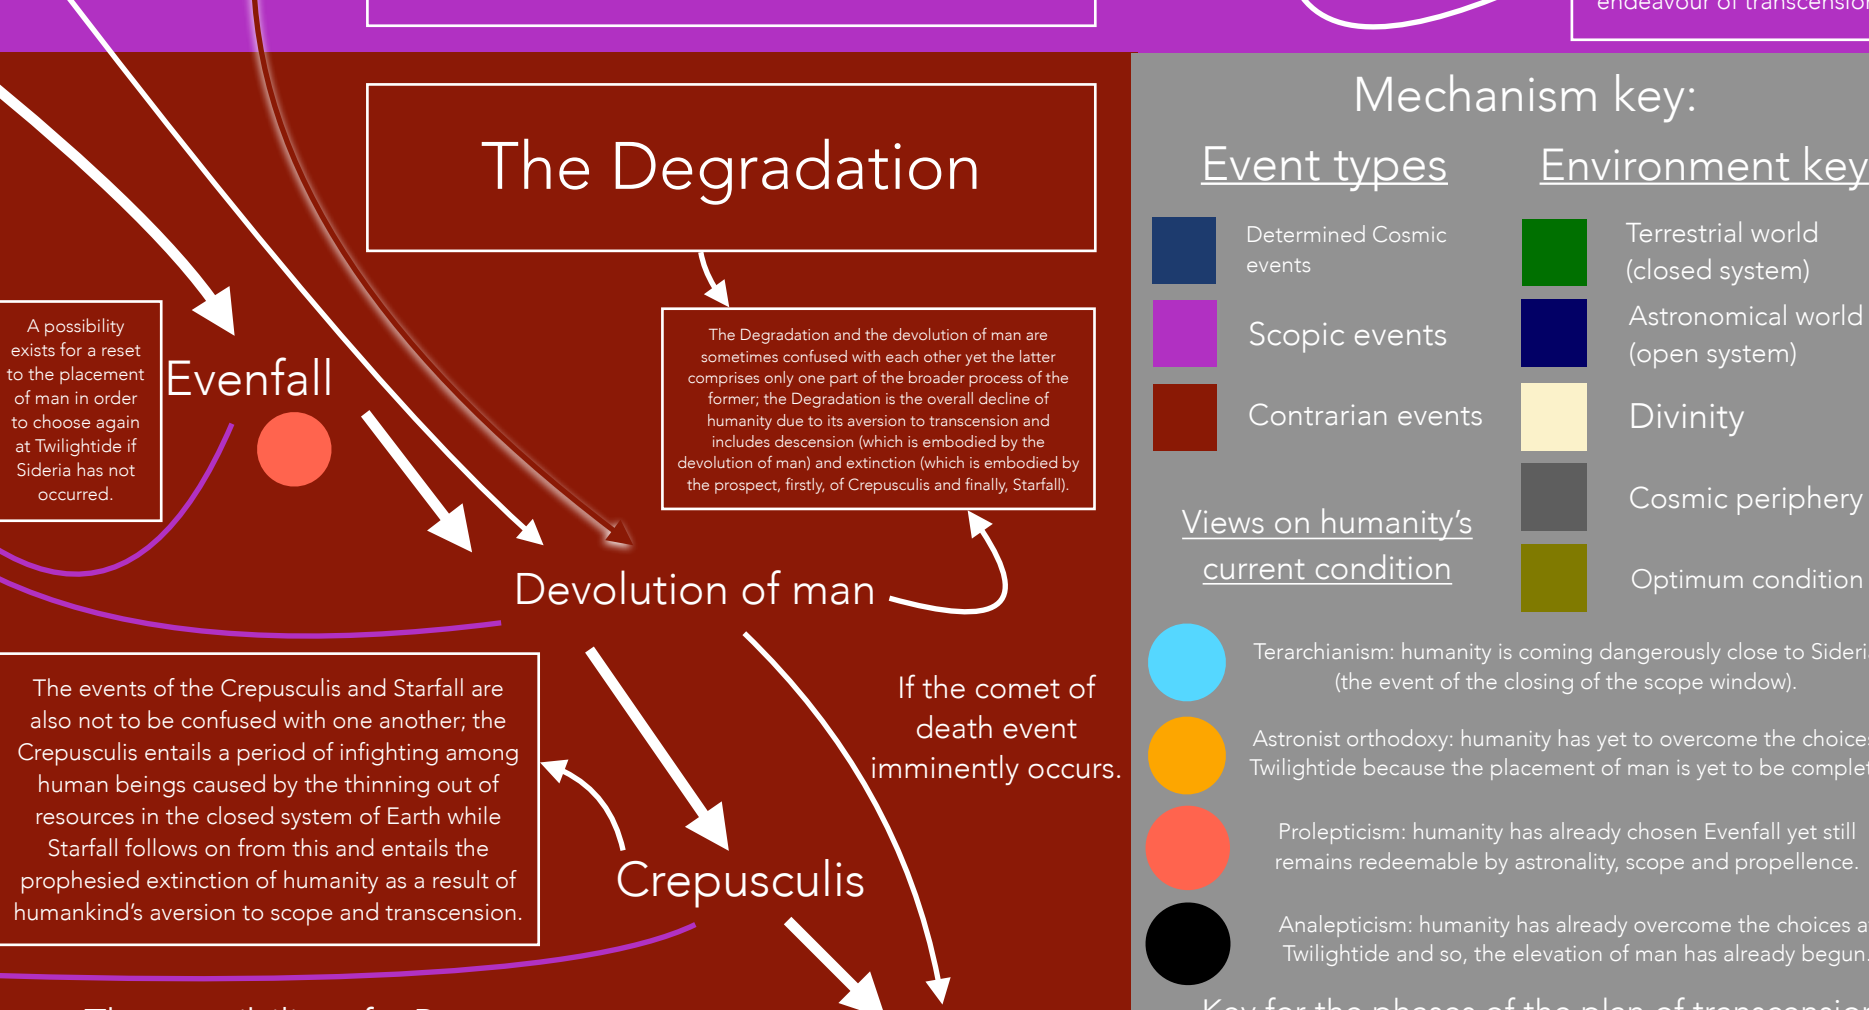

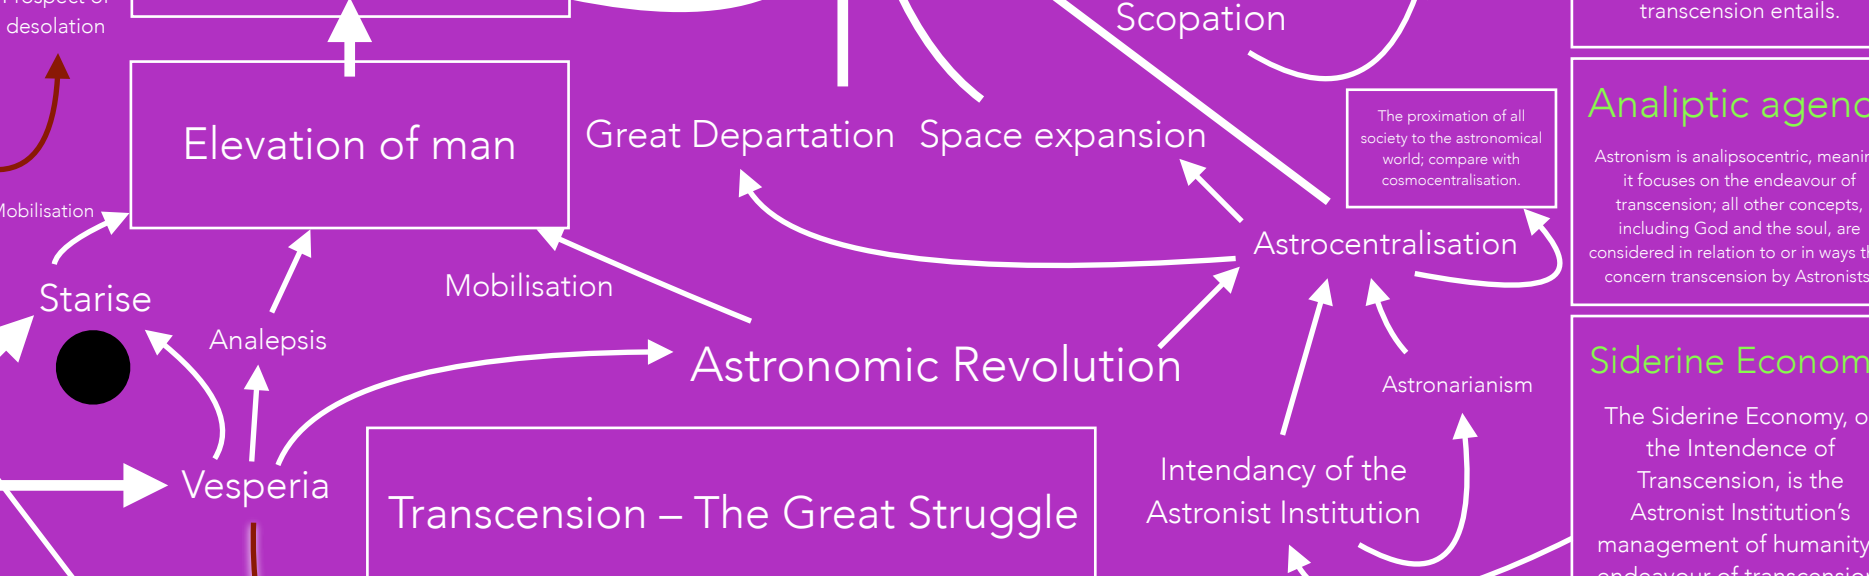

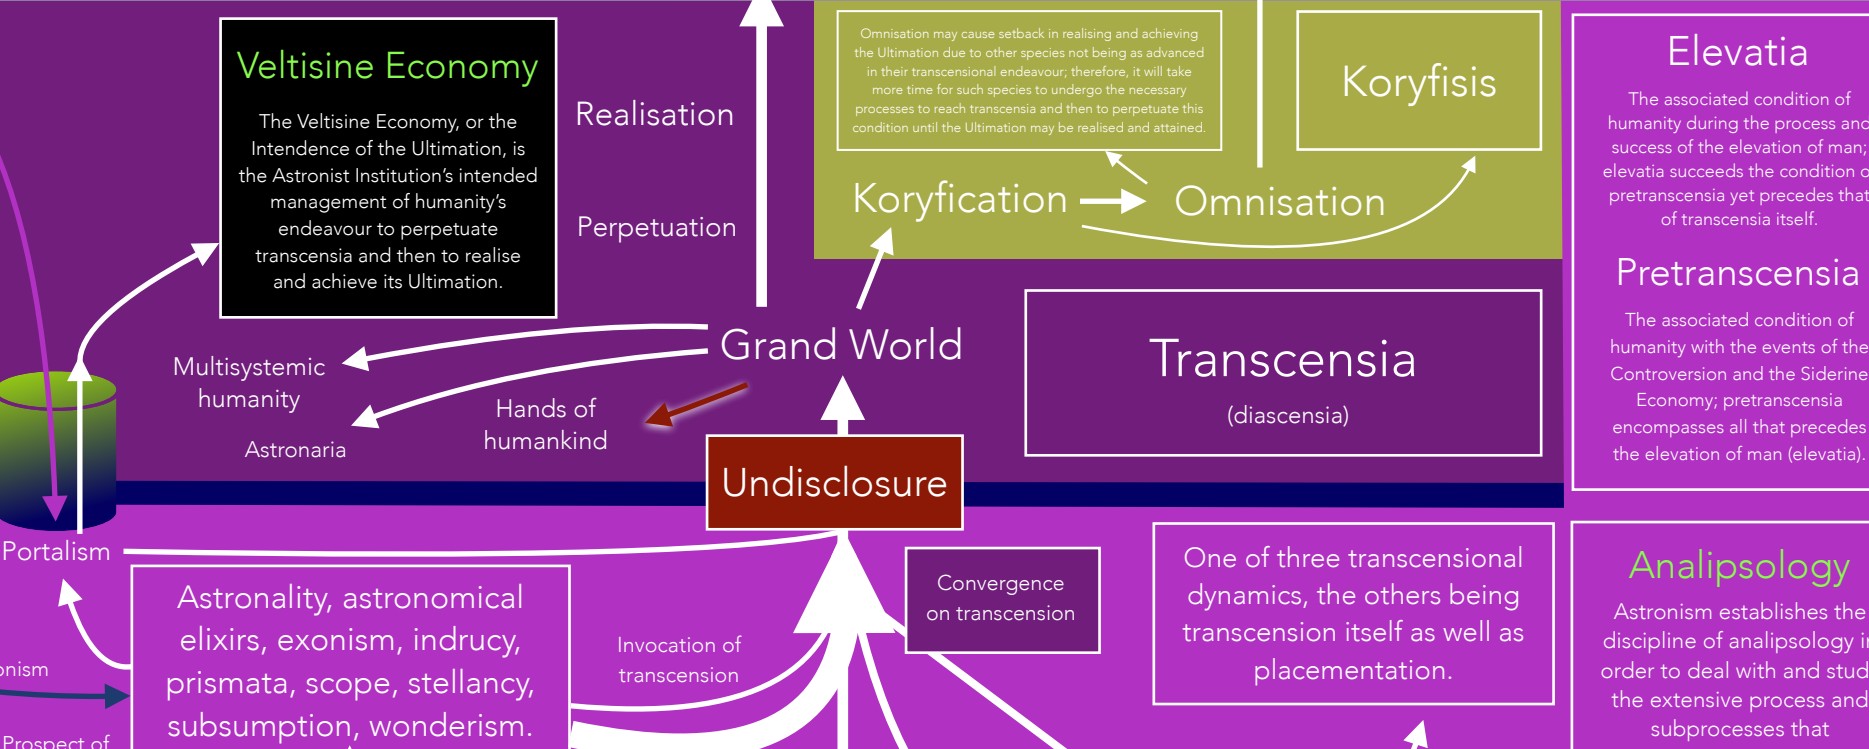

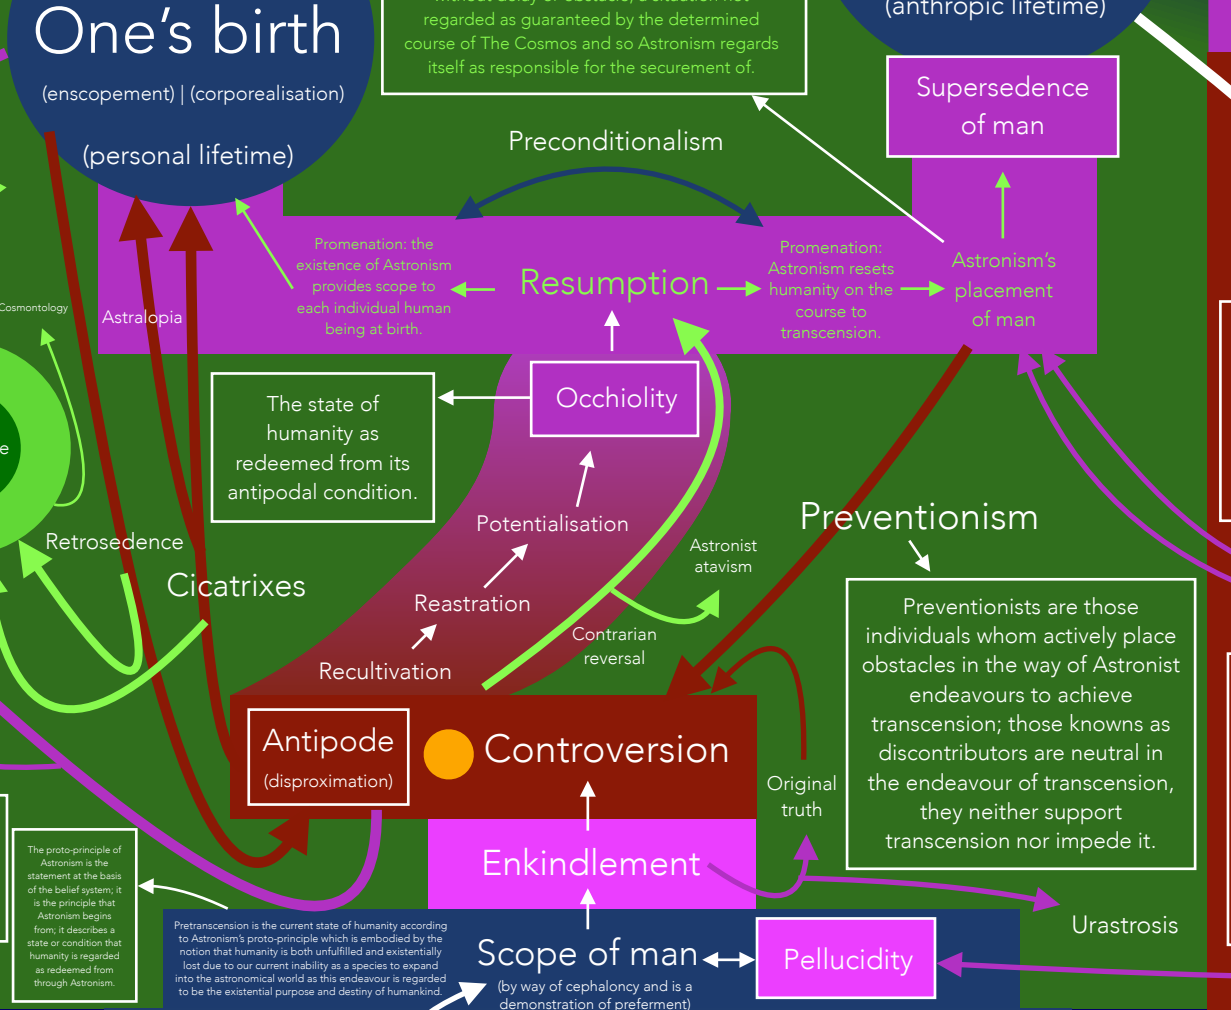

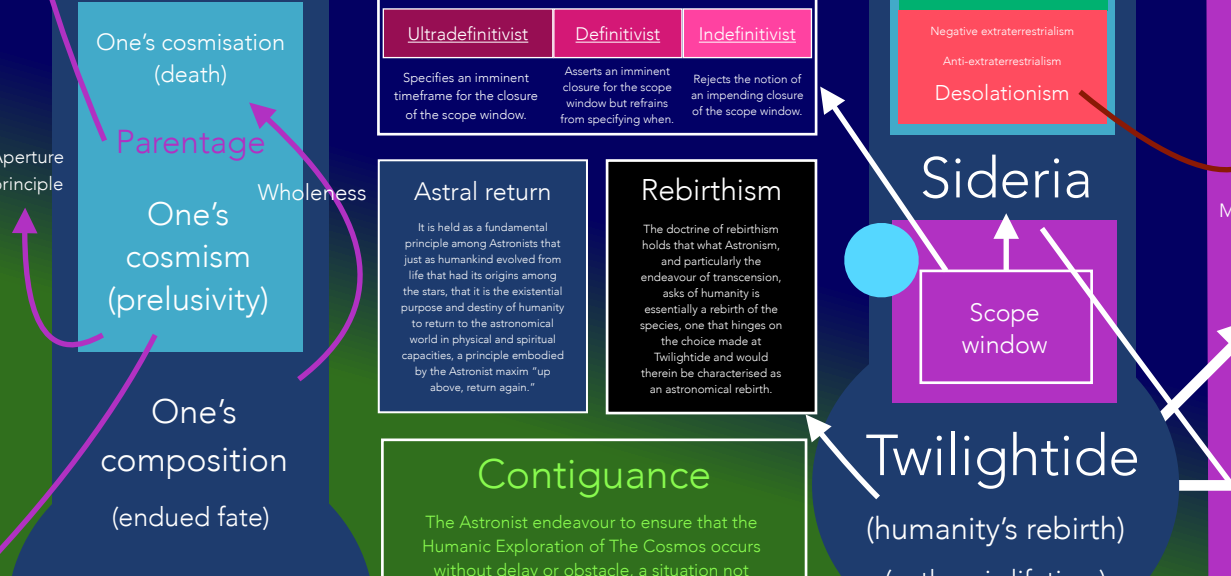

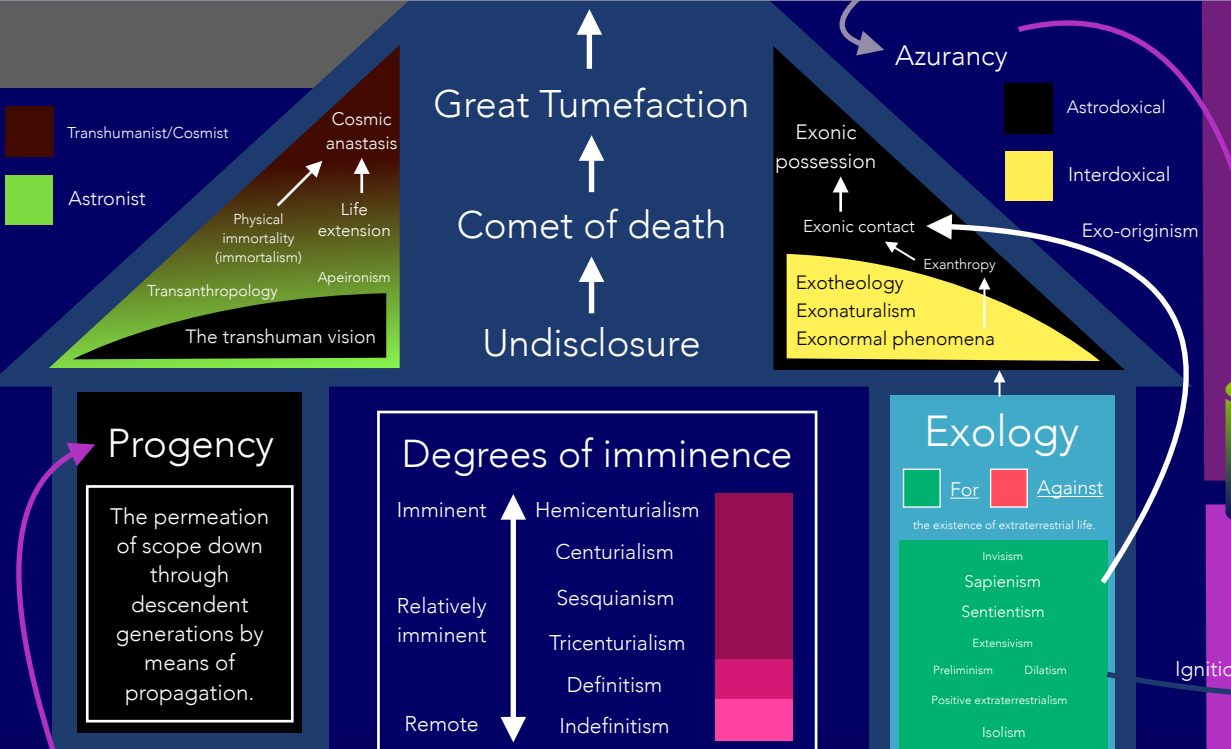

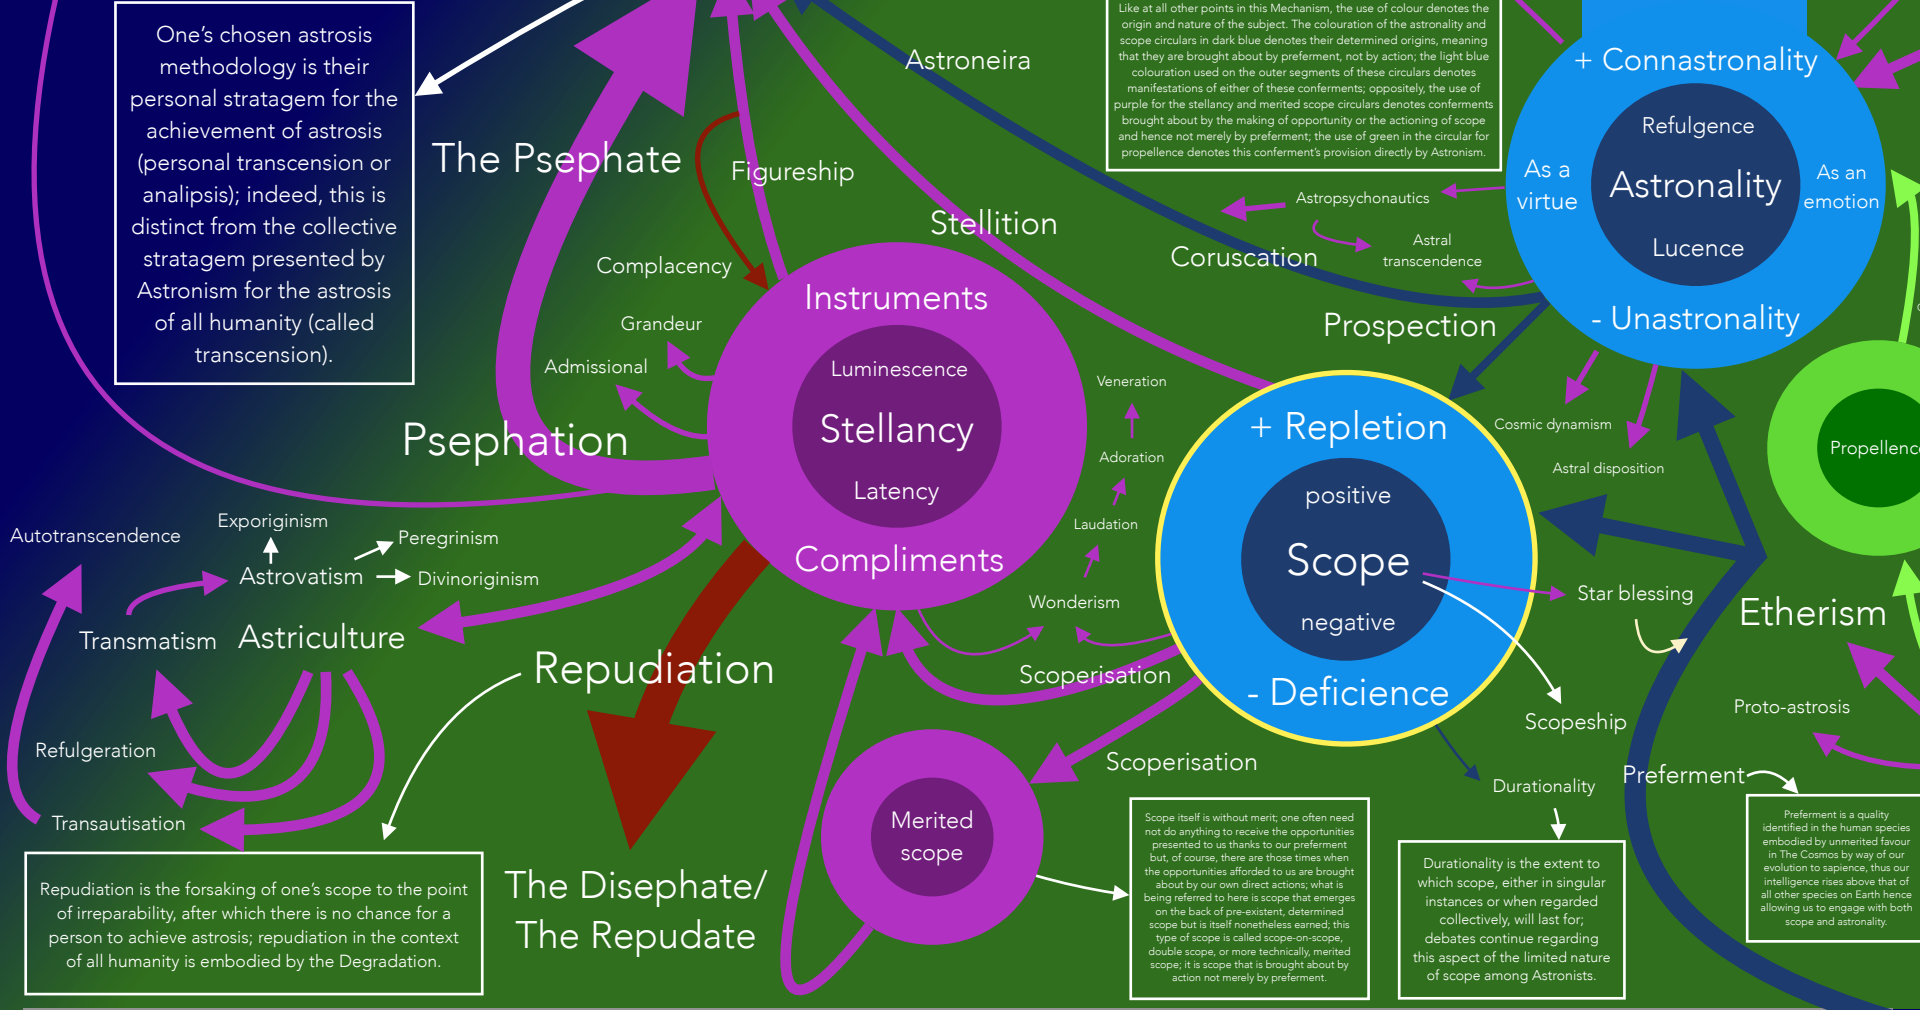

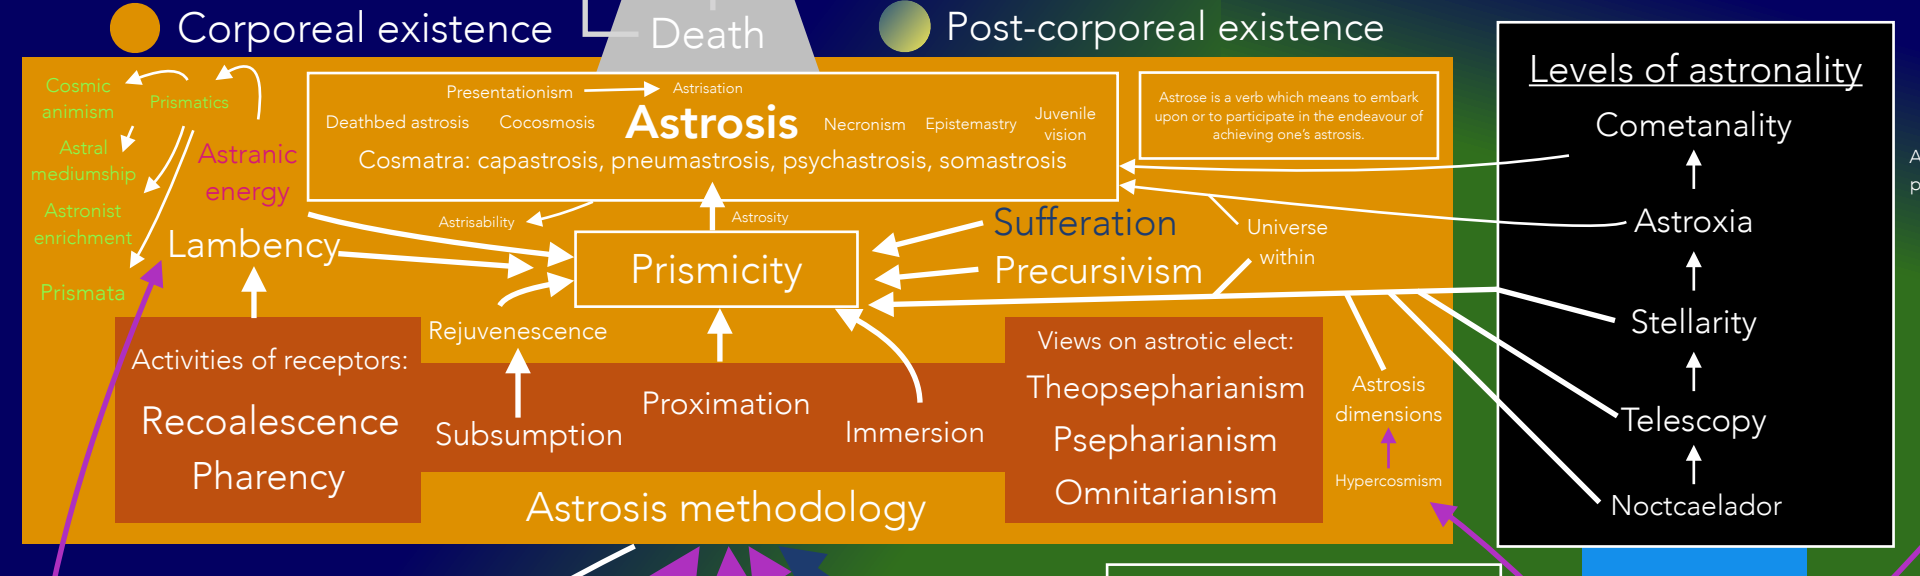

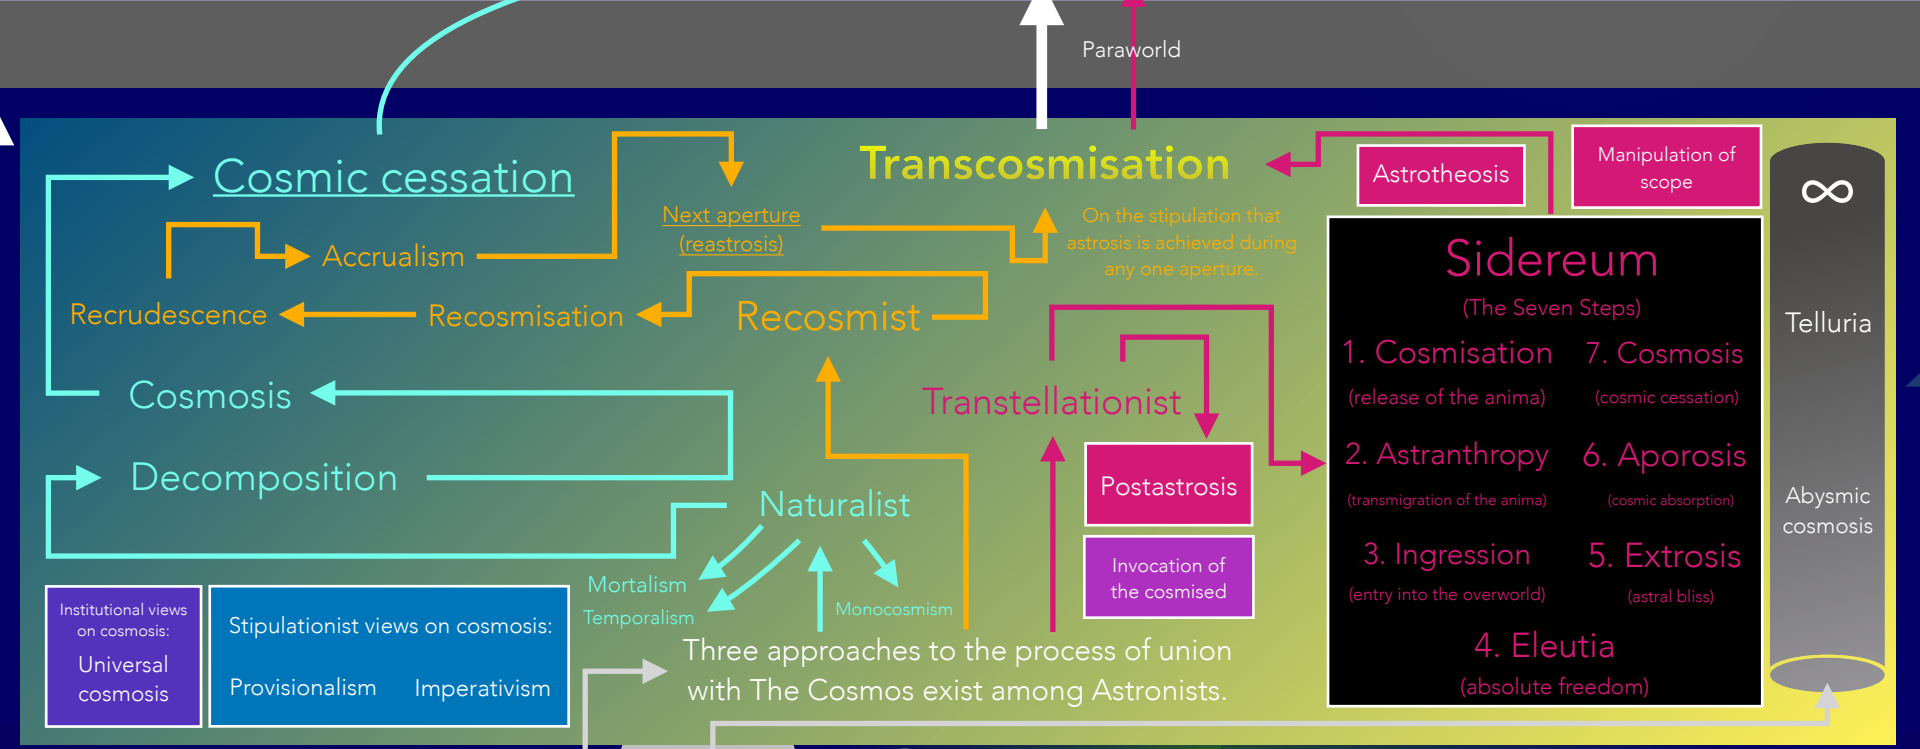

© 2021 Astronomer Institution. All Rights Reserved. Completed: 9th August 2021. Visit [www.astronomer.com](http://www.astronomer.com)

This mechanism has been produced primarily from Omnidoxical and interdoxical concepts; the small degree of concepts of Astrodoxical origin are provided in black boxes; please use The Institutional Dictionary of Astronomism to help with the defining of terms in this Mechanism.

**Issue of ensoulment**  
Astrosynarianism: Ensoulment occurs at astronara.  
Transtellationism: Ensoulment occurs at mortal conception.  
Naturalism: Ensoulment is either rejected or is not addressed.

**Supernaturalism**  
The belief that the astronomical world is either literally or intermediately the heaven spoken of in many religions throughout history as based on the widespread notion of heaven existing above or depicted in relation to the sky.

**Mechanism key:**

**Event types**

- Determined Cosmic events
- Scopic events
- Contrarian events

**Environment key**

- Terrestrial world (closed system)
- Astronomical world (open system)
- Divinity
- Cosmic periphery
- Optimum condition

**Views on humanity's current condition**

- Terarchianism: humanity is coming dangerously close to Sideria (the event of the closing of the scope window).
- Astronomer orthodoxy: humanity has yet to overcome the choices at Twilightide because the placement of man is yet to be completed.
- Prolepticism: humanity has already chosen Evenfall yet still remains redeemable by astronality, scope and propellence.
- Analepticism: humanity has already overcome the choices at Twilightide and so, the elevation of man has already begun.

**Key for the phases of the plan of transcension**

- Unmanaged transcension
- Intendence of Transcension
- Veltisine Intendence

**Some mechanism keywords explained**

- Extraction – the process of man's potentialisation and fulfillment of the human species by way of transcension as the Astronomer form and conception of salvation.
- Channel – any means by which astrosis or transcension may be achieved; split between physical, intellectual and spiritual channels.
- Predetermination – the embodiment of determinism in Astronomism as the destiny of humankind to return to The Cosmos evidenced by the unique evolution of humanity which in turn embodies the doctrine of preferment.

**Preferment** is a quality identified in the human species embodied by universal factor in The Cosmos by way of our intelligence rises above that of all other species in Earth hence allowing us to engage with both scope and astronomy.

**Preferment** is the current state of humanity according to Astronomism's proposition which is embodied by the notion that humanity is both unfulfilled and essentially lost due to the current inability as a species to transcend into the astronomical world as this endeavour is regarded to be the essential purpose and destiny of humankind.

**Starfall** is the final event of the plan of transcension, it is the ultimate extinction of humanity as a result of humankind's aversion to scope and transcension.
